

# Side Guard Measurement Form

Please fill out form and scan and email or fax back to us  
[info@walkerblocker.com](mailto:info@walkerblocker.com) or (800)733-7450

Measurements Required to create an accurate Quote or Evaluation

**Please provide all Measurements in Inches.**

#1. The distance from the Frame Rail of the truck to the outside edge of truck body.

#2. The distance from the ground to the Top of the Frame Rail.

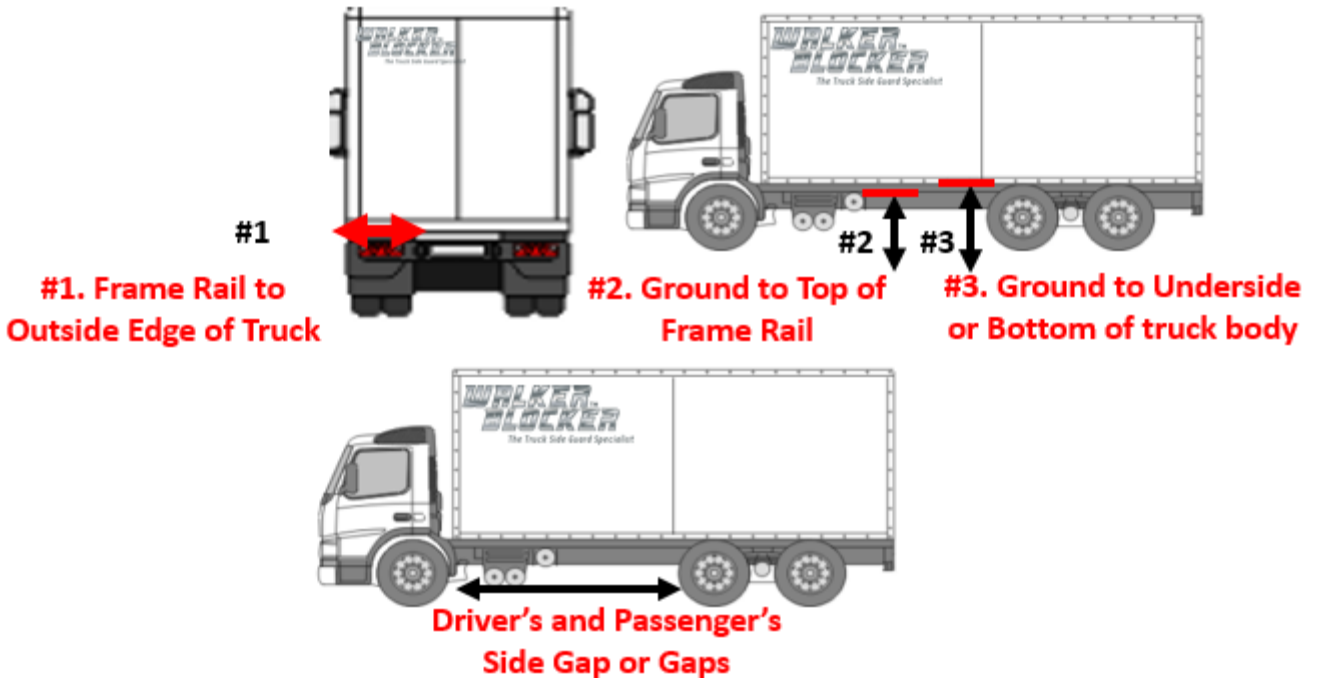

#3. The distance from the ground to the Underside or Bottom of the truck body.

### Driver's and Passenger's Side Gaps

We are only looking for the gap or gaps between the front and rear tires. The gaps from the rear tire to the back of truck do not need to be covered. In many cases you will have more than one gap per side. There might be a gas tank or hydraulic tank etc. that fulfills a side guard requirement so we work around them.

**Pictures – Please provide a picture or pictures of both sides of the truck**

**Special Notes – Please provide any special notes that might include a gear, tank, control or other object that might need to be accessed.**
