WALKER BLOCKER™
The Truck Side Guard Specialist

FLEET EVALUATIONS

Free evaluations. Installation that works around your schedule.

Walker Blocker side guards on a box truck

ADDING SIDE GUARDS TO A FLEET?

Whether a city contract, an insurer or your own safety team is asking for side guards, we'll do the legwork. Our side guard team comes to you, looks at every truck and tells you exactly what each one needs.

EVERY EVALUATION INCLUDES

- Photos and measurements of each truck
- Which trucks are already covered by tanks, toolboxes or body parts that meet the Volpe specification
- Recommendations for each truck, based on the Volpe specification
- A written quote

HOW IT WORKS

ONSITE EVALUATIONS

Free for larger fleets. For fleets outside Washington State, onsite visits start at 25 vehicles.

SMALLER FLEETS

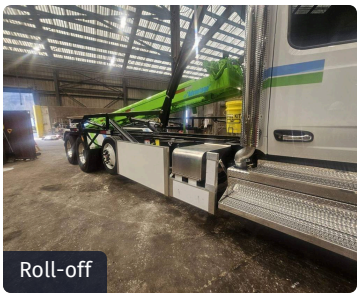

Still free. We'll walk you through measuring with our sizing guide and photos, then quote each truck.

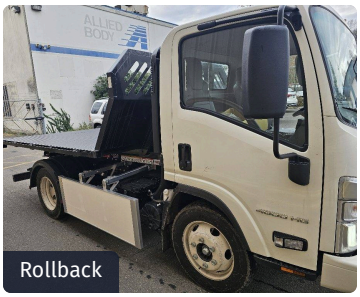

KITS SHIP ANYWHERE

We ship complete kits across the U.S. and to Canada for your technicians or a local installer.

INSTALLATION WITHOUT DOWNTIME

- **Onsite installation** at your yard
- **After hours or overnight**, so your trucks stay in service during the day
- **Professional installers** from our own team
- Or bring trucks to our Seattle shop
